What is "Thimbles" by Onlyplay?

Thimbles is an online instant win game that offers you an opportunity to play with 4 different characters and in 3 game modes. The objective of the game is to guess under which thimble the stone is located and to take the Win with the highest coefficient.

Possible multipliers for 3 thimbles level of complexity

Levels of Complexity

In Thimbles there are several levels of complexity and you have an opportunity to choose how many thimbles you want to play with. The higher is the amount of thimbles, the higher are the multiplier coefficients and the bigger is your Win. You can choose the level of complexity by clicking on the corresponding button in the left part of the screen.

3 thimbles

- 3 thimbles on the table;
- minimal multiplier coefficient is ×**3**;
- highest possible multiplier ×**20 000** is in 9 successful guessing of the thimble under which the stone was located.

4 thimbles

- 4 thimbles on the table;
- minimal multiplier coefficient is ×**4**;
- highest possible multiplier ×**70 000** is in 8 successful guessing of the thimble under which the stone was located.

5 thimbles

- 5 thimbles on the table;
- minimal multiplier coefficient is ×**5**;
- highest possible multiplier ×**100 000** is in 7 successful guessing of the thimble under which the stone was located.

The chosen level of complexity is highlighted in orange. The level of complexity may be chosen prior to the start of the game round.

Characters

You can choose whom you would like to play with, namely Mexican baddie - Fuego, Japanese cutie - Momoko, Russian crime lord - Docent and Caribbean corsair - Morgan. The character may be chosen prior to the start of the game round by clicking on the corresponding character image in the right upper part of the screen.

How to start the game round?

To start the game round you have to make a bet and click on one of the thimbles under which you think the stone is located. The game round lasts from the moment you clicked on the first thimble (after the bet was made) till the moment you clicked on the thimble under which no stone is located or take the Win, whichever occurs first. In the event you clicked on the thimble under which no stone is located, you lose the game round, the bet and Win awarded during such a game round (Wins are usually highlighted). The game round completes automatically after you have opened 7, 8 or 9 thimbles with stones (it depends on the chosen level of complexity) consecutively.

In the event when you flip the coin in Coin window, the ongoing game round is automatically completed and the Win awarded to you is your bet required to flip the coin in the Coin Wi

The bet is made automatically when you click on any thimble. The game round ends when one of the following occurs there is no stone under the thimble you have clicked on - meaning you lose or you click on the "COLLECT NOW" button, whichever occurs first.

Please pay attention to the fact that shuffling of thimbles does not start or end the game round.

How to make a Bet?

In order to start a game round you must make a bet by choosing a bet value with corresponding "+" and "-" buttons. A bet value is indicated in the currency in which you play on the platform. Each game round you play in - is subject to your bet, meaning each time you start a game round, a bet amount indicated in the Bet module is deducted from your balance. The bet is made when you click on any thimble.

Max Bet

You can choose the maximum value of the bet by clicking on the MAX BET button.

How to take the Win?

In Thimbles the amount of your Win is equal to your bet value multiplied by applicable multiplier coefficient. The multiplier coefficient that will apply to the Win (in case you will guess and click on the thimble under which the stone is located) is highlighted in yellow. The multiplier coefficients are indicated below the table. The multiplier coefficients and their number depend on the chosen level of complexity.

The Win awarded to you is indicated in the Win module that appears just after your first choice in the ongoing game round of the thimble under which the stone was located.

In case you want the payout of the awarded Win you have to click on the "COLLECT NOW" button. Please pay attention that awarded Wins are not summambe, each time you click on the thimble in the ongoing game round you are either awarded with the new Win or lose the game round in case you meaning prior to choosing and clicking on the thimble under which no stone is located.

The multipliers are not summable and may not be combined.

Payout rules

There are no paylines in this game. The payout of Win is made automatically after you click on the "COLLECT NOW" button.

Coin flipping

You may double the Win amount awarded to you by flipping the coin. By clicking on the Coin you open the Coin window. By clicking on the "WIN" button You bet your Win and flip the coin. The coin flipping results either in doubling your Win or reducing your Win amount two times.

As a result of one coin flip the new Win is formed - Coin Win. You can either take the Coin Win by clicking on the "TAKE" button and automatically end the Coin game or flip the coin one more time by clicking on the "WIN" button. Please pay attention that each flip of the coin is subject to your bet. Your bet is either the Win awarded to you in Thimbles game round or the Coin Win.

Payout of Coin Win is made automatically after you click on the "TAKE" button.

Bonus Game

In Thimbles you can activate the Bonus Game session by completely filling the Progress Bar of one or more Characters (when it is 100% full). The Progress Bar of the Character appears after you guessed and clicked on the thimble under which the stone was located. The Progress Bar is filling each time you guessed and clicked on the thimble under which the stone is locked. The higher is the coefficient applicable to the Win, the more the Progress Bar will be filled. If you play with several Characters, you may have several Progress Bars.

After the Progress Bar of one Character is 100% filled, you are awarded with one Key and can start the Bonus Game session. The more Keys you have, the more boxes you can open in the Bonus Game session. The Bonus Game session starts when you click on the "I WANT A BONUS GAME" button in the Bonus Game window (is opened by clicking on the activated Bonus Game symbol). By clicking on "I WANT A BONUS GAME" button your game round will be automatically completed and your Win will be paid out (if any). The Bonus Game session ends when no more Keys left.

In the Bonus Game you have to open the boxes. Each box contains a Bonus Win - a particular part of the Bonus Game Pool. Each time you make a bet, a contribution equal to 8% of your bet is added to the Bonus Game Pool. The Bonus Game Pool is divided in the following way:

- 1 box contains 50% of the Bonus Game Pool;
- 1 box contains 4% of the Bonus Game Pool;
- 2 boxes contain 2% of the Bonus Game Pool (each);
- 3 boxes contain 1% of the Bonus Game Pool (each).

By clicking on the box you are awarded with the Bonus Win that it contains. The payout of the Bonus Win is made after the Bonus Game session is completed.

RTP

RTP is equal to **90% + 8% (bonus game)**.

RTP - means a theoretical statistical percentage of the total money bet in a game that is paid out as winnings over time.

Additional Information

The following issues and settings may be subject to the terms and conditions of the platform where you play:

- procedures used to manage unfinished games;
- time after which inactive game sessions automatically end.

For more information you have to refer to the website of the platform where you play.
Unless other procedures are established by the platform where you play:

- in the event when ou did not play Thimbles on the same platform within 24 hours from your last play or have cleaned your history of visits, all Progress Bars, Keys, Bonus Game Pool will be automatically repealed.

Your Progress Bar may be also automatically repealed due to your browser or device settings, use of VPN.

Please pay attention to the fact that on some devices clicking near the thimble or any button is equal to clicking on the thimble or corresponding button.

In the event of malfunction of the gaming software, all affected game bets are rendered void and all affected bets are refunded. Rendering of bets void means that any wins, including Wins and jackpot wins, as well any other bonuses formed or credited as a result of void bet become void and shall be rendered.

Please pay attention to the fact that the internet connection speed may affect the gameplay.
